## PRODUCTION PLANNING AND CONTROL

DATE : JANUARY 12 & 13, 2026 | WEDNESDAY - THURSDAY

TIME : 9.00AM - 5.00PM

VENUE : FMM, MALACCA BRANCH

Production Planning and Control (PPC) is a system for organizing, scheduling, and overseeing manufacturing processes to ensure efficiency, quality, and timely delivery. It involves planning what, when, and how to produce, and then controlling the execution to make sure the plan is followed. The process helps optimize the use of resources like materials, labor, and equipment, and coordinates with other departments such as sales and procurement. Production planning is an important function that can boost profitability and customer satisfaction as well as efficiency. It helps companies match output to demand, optimize production processes and determine how to overcome production problems.

### SPEAKER:

**MR. TEE TUAN CHUAR**

**FREE FOR GS1 ACTIVE MEMBERS**

*\*As per terms and conditions*

**ACTUAL TRAINING FEE = RM1,350/PAX**

**LIMITED SEATS AVAILABLE!  
(FIRST COME FIRST SERVE BASIS)**

**PLEASE REGISTER HERE:**

### KEY BENEFITS OF GS1 MALAYSIA - FMM INSTITUTE:

Effective Production Planning and Control ensured smooth production flow and quality output thus resulted in cost saving.

- To learn the principles and practices in planning and control, the success factor of production.
- To learn the effective control over WIP, to reduce wastage in manpower, materials and machine operating costs.
- To implement Production Planning And Control System.

### COURSE OUTLINE:

- MODULE 1: Production Planning and Control Profile
- MODULE 2: Production Planning and Control Process
- MODULE 3: The Production Scheduling
- MODULE 4: The Production Planning and Strategic Management
- MODULE 5: The Production Planning and Control System Design and effective management system

### TARGET GROUP:

- Production Planner
- Production Manager
- Executives
- Production Admin
- Staff members
